

Solid Edge will run on any graphics card that supports Windows NT® 4.0, Windows 2000®, Windows XP®, Windows ME® or Windows 98®.
 Contact your graphics card manufacturer to determine whether their graphics adapter or driver supports these operating systems.

Following is a list of new graphic cards and associated drivers that were specifically tested at the request of the card manufacturer. These cards were run through a series of display system tests which exercise all combinations of the display and rendering system. This list should not be interpreted as the only cards Solid Edge will successfully run with.

V9 GRAPHIC CARDS				
Mfg	Model	O/S	Driver Vsn.	Comments
ATI Technologies	ATI Radeon Workstation	Win2000	5.13.01.3083	Random aborts after in place activation
